What is this product?

Type

This product is a sub-fund of the fund FFG constituted in the form of a variable capital investment company with multiple sub-funds under Luxembourg law subject to Part I of the Luxembourg law of 17 December 2010 on undertakings for collective investment.

Term

This sub-fund has no maturity date. However, the manufacturer may decide to close the sub-fund under certain circumstances.

Objectives

Seeking long-term capital gain through the pursuit of a sustainable investment goal.

Besides its financial objective, the sub-fund generates a tangible social impact. Funds For Good (the fund's distribution co-ordinator) pays out half of its profits to Funds For Good Impact, a socially responsible company fighting poverty through job creation, which allocates honorary loans and offers support to disadvantaged people with a business plan.

The sub-fund invests a minimum of 75% of its net assets in equities of companies listed on a regulated European market.

A maximum of 10% of net assets may be invested in open-ended investment funds.

The sub-fund may also use derivatives for hedging purposes or to optimise portfolio exposure.

Companies are selected on the basis of their intrinsic quality and valuation and will be subject to corporation tax under ordinary law or an equivalent tax.

The sub-fund will make all of its investments (excluding cash and instruments used for hedging purposes) in sustainable assets.

In addition, the manager excludes from its investment universe companies generating more than 10% of their income from the following activities: thermal

coal (extraction and energy generation) and oil (extraction, refining and energy generation), gold mines, arms, alcohol, tobacco and gambling.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

Intended retail investor

This product is intended for investors seeking income and capital growth in the long term. The investor may incur losses up to the amount invested. This product is suitable for investors with basic and in-depth knowledge and experience of the product and the global equity markets.

Other information

Depository: Banque de Luxembourg

Dividend income: This class is a capitalisation class meaning that income is reinvested.

Conversion right: The investor has the right to convert his investment in shares in one sub-fund for shares in the same sub-fund or in another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

Segregation: The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds.

Additional information: Additional information about the fund, copies of its prospectus, the latest annual and semi-annual report and the latest prices of shares may be obtained free of charge from the management company or on www.fundsforgood.eu. The prospectus and the periodic reports are prepared for the entire fund and are available in French. The management company may inform you about other languages in which these documents are available.

This sub-fund was launched in 2023 and this share class in 2023.

The currency of the share class is expressed in EUR.

What are the risks and what could I get in return?

Risk indicator

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 15 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment between December 2021 and December 2022, by referring to a reference class.

because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: There may be other risk factors.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Moderate scenario: This type of scenario occurred for an investment between January 2012 and January 2022, by referring to a reference class.

Favourable scenario: This type of scenario occurred for an investment between March 2009 and March 2019, by referring to a reference class.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if FFG is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque de Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 5 years	If you exit after 10 years
Total costs	495 EUR	1,726 EUR	4,371 EUR
Annual cost impact (*)	5.0 %	2.6 % each year	2.3 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.6% before costs and 6.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
